

Lane Transit District

# LTD System Review

LTD is beginning to build back service while recovering from the effects of the COVID-19 pandemic. The LTD System Review will examine current and past performance on the fixed route network and identify opportunities for improving the system. We will be working with the community to answer:

Do you want more frequent transit service?

Would you like earlier or later service on a particular day?

Do you want LTD to invest in better infrastructure?

Should LTD explore other mobility solutions, like on-demand service?

The System Review started in the Fall 2023 and will conclude in the Summer 2024. Specific analysis and community outreach tasks include:

Analysis of fixed route ridership and performance

Coordination with LTD staff and other regional partners

Community input on service improvement priorities

Development of transit service improvement alternatives

On-board passenger survey

Short- and long-term improvement recommendations
